PROFESSIONAL SUMMARY

Frontend Engineer experienced in building responsive, user-focused web applications using React, Next.js, and TypeScript. Skilled in developing reusable component systems, translating designs into polished interfaces, integrating REST APIs, managing application state, and implementing automated testing. Experienced working across design, product, and engineering teams, with a strong focus on frontend architecture, accessibility, performance, and maintainable code.

CORE SKILLS

- **Frontend Development:** React, Next.js, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS, SCSS, Framer Motion
- **UI Engineering:** Responsive Design, Figma-to-Code Implementation, Component-Based Architecture, Design Systems, Reusable Components, Accessibility (WCAG)
- **State Management & Data Fetching:** Zustand, TanStack Query, Axios
- **API & Backend Integration:** REST APIs, Supabase, Firebase, Convex, PostgreSQL, SQL
- **Testing & Quality:** Playwright, End-to-End Testing, Test Automation, Gherkin, CucumberJS, Debugging, Code Reviews
- **Web Quality:** Performance Optimisation, SEO
- **Collaboration Tools:** Git, GitHub, GitLab, Figma

PROFESSIONAL EXPERIENCE

Moniepoint Inc.

Lagos, Nigeria.

Frontend Engineer Intern

May 2024 - October 2024

- Developed reusable UI components for the Kamona Design System, supporting consistency across multiple products and frontend teams.
- Built and maintained Playwright end-to-end tests for MonieWorld, helping validate foreign exchange workflows and improve release confidence.
- Collaborated with designers and engineers to implement components aligned with design specifications, accessibility requirements, and frontend best practices.
- Participated in code reviews, debugging, and quality assurance activities to improve component reliability and usability.
- Worked within a cross-functional product team using modern frontend development workflows.

Pysis Technologies

Abuja, Nigeria.

Frontend Engineer (Contract)

November 2023 - April 2024

- Developed frontend features for FishDey, a fish market web application, using React and TypeScript.
- Integrated REST APIs and managed client-side application state using Zustand to support application workflows and reliable data flow.
- Built reusable, responsive UI components using Tailwind CSS, improving consistency and maintainability across the application.
- Diagnosed and resolved frontend issues during development to improve component behaviour and user experience.
- Collaborated with engineers and stakeholders through code reviews and technical discussions.

Stutern

Frontend Developer (Contract)

Lagos, Nigeria.

April 2022 - June 2022

- Led the frontend redesign of key marketing pages, improving visual presentation and user experience.
- Translated Figma designs into responsive web interfaces using HTML, CSS, and Bulma.
- Integrated custom illustrations and updated learning-track content to improve clarity and engagement.
- Delivered responsive layouts with consistent behaviour across desktop and mobile devices.

FEATURED PROJECTS

Asoebi Fashion Week | Fashion & Event Technology Platform

Freelance

[Live Preview](#) | [Case Study](#)

- Designed and developed a live web platform for Asoebi Fashion Week using modern React and Next.js architecture.
- Built responsive interfaces and reusable components across event, fashion, application, and content experiences.
- Developed interactive application workflows and administrative functionality while maintaining clear user feedback and interface states.
- Structured the application around reusable components and maintainable feature modules.
- Delivered a polished responsive experience with strong attention to typography, layout, accessibility, and visual detail.

Mesken Consulting | Education Consultancy Website

Freelance

[Live Preview](#) | [Case Study](#)

- Developed a responsive client-facing website for an international education consultancy.
- Translated the project's visual direction into reusable frontend interfaces with attention to layout, typography, spacing, and information hierarchy.
- Structured pages and components to maintain a consistent experience across the website.
- Built responsive experiences across desktop, tablet, and mobile screen sizes.

PeerShelf | Academic Resource Sharing Platform

Personal

[Live Preview](#) | [Case Study](#)

- Designed and developed an academic resource-sharing platform that enables students to upload, discover, request, and manage educational materials.
- Implemented authentication, resource-management workflows, search, filtering, and responsive user experiences.
- Integrated REST APIs to support file uploads, borrowing workflows, notifications, and user interactions.
- Structured the frontend around reusable components and maintainable API-driven architecture.

CertifyChain | Blockchain Certification Verification System

Personal

[Live Preview](#) | [Case Study](#)

- Developed a certificate verification application with upload, verification, and history-tracking workflows.
- Managed client-side state with Zustand and integrated frontend functionality with supporting services and REST APIs.
- Built reusable React components around structured verification workflows.

EDUCATION

University of Ilorin

Bachelor of Science (B.Sc.) in Computer Science

Second Class Upper Division (4.16/5.00)

Ilorin, Kwara State, Nigeria.

June 2021 - August 2025

TRAINING & CERTIFICATION

- [Frontend Development](#) — Stutern Graduate Accelerator | 2021
- [Frontend Web Development](#) — Future Academy Africa | 2022
